Self learning and training

Achievements

- [International Collegiate Programming Contest \(ICPC \)](#)

Projects

- [Furniro](#)

An online fullstack furniture store made with Next.js and Typescript, TailwindCSS for styling components, Stripe for payment processing, Clerk to authenticate and manage users, Strapi CMS and React Query with Axios for API endpoints requests.

- [WEBHO](#)

WEBHO is a platform that filters and ranks the best websites . Made with Next.js, TailwindCSS for styling components & Material UI . You can sign up , explore the best websites of their category , add websites to your favorite and like/dislike them.

- [Zoom Clone](#)

A professional enterprise-ready video conferencing where you can sign up using many different ways and make your own meet and share the meeting link with many people, you also can schedule meetings, see calls history and upcomings, record and watch calls and many other features. Made with Next.js & Typescript, TailwindCSS for styling components, Stream.io for video & audio chat, Shadcn/ui for components library.

- [Instagram Clone](#)

Through the use of Next.js, Material UI, and Redux Toolkit, I were able to create a polished and professional application that closely mimics the experience of using the official Instagram website. Many of the popular features of the original site are present in this clone.
